

# Iron Tie Wire 1.6mm Diameter (15kg Coil)

Product Code: GHT9305

## Application

Used for fixing adjacent heating elements together before wrapping pipework, fixing heating elements in place and also used for securing insulation blanket over heating elements when in-situ.

| Specification              |                                     |
|----------------------------|-------------------------------------|
| Diameter                   | 1.6mm                               |
| Finish                     | Black annealed                      |
| Supply format              | 15kg loose coil rolls               |
| Aproximate length per roll | 900m per roll                       |
| Tensile strength           | 20 to 26 tons per square inch (tsi) |
| Conformity                 | BS 1052                             |
